Module 3 Central Tendency Practice Assignment: Using the dataset (for the last time) (**12pts possible**)

1. Calculate and state the measure of central tendency for each of the four variables! Report on what you found for each variable. (**8pts**)
2. Calculate the appropriate measure of central tendency for Age from the grouped distribution. Report the difference if any for Age. (**4pts**)
3. **You can use** easycalculation.com **to check your answers!**
